SQL SELECT — Gamers Practice

60 step-by-step questions with SQL queries and simple explanations

Table: gamers

Columns: player_id, username, country, platform, rank_tier, level, score, coins, join_date

Teaching order: Basic SELECT → WHERE → Comparison Operators → AND → OR → NOT → LIKE → NOT LIKE → BETWEEN → IN → DISTINCT → COUNT → SUM → AVG → MIN/MAX → Mixed Practice

Level 1 — Basic SELECT

Question 1. Display all gamers

```
SELECT * FROM gamers;
```

Example / Explanation: `*` means all columns.

Question 2. Display only username and country

```
SELECT username, country FROM gamers;
```

Example / Explanation: We can select only the columns we need.

Question 3. Display username, level and score

```
SELECT username, level, score FROM gamers;
```

Example / Explanation: Select only the required columns.

Level 2 — WHERE

Question 4. Find gamers from India

```
SELECT * FROM gamers WHERE country = 'India';
```

Example / Explanation: WHERE filters particular rows.

Question 5. Find gamers using PC

```
SELECT * FROM gamers WHERE platform = 'PC';
```

Example / Explanation: The condition keeps only PC gamers.

Question 6. Find gamers having Gold rank

```
SELECT username, rank_tier FROM gamers WHERE rank_tier = 'Gold';
```

Example / Explanation: Shows gamers whose rank is Gold.

Question 7. Find gamers whose level is 80

```
SELECT * FROM gamers WHERE level = 80;
```

Example / Explanation: `=` means equal to.

Level 3 — Comparison Operators

Question 8. Find gamers whose level is greater than 80

```
SELECT * FROM gamers WHERE level > 80;
```

Example / Explanation: `>` means greater than.

Question 9. Find gamers whose score is less than 10000

```
SELECT * FROM gamers WHERE score < 10000;
```

Example / Explanation: `<` means less than.

Question 10. Find gamers whose level is 50 or more

```
SELECT * FROM gamers WHERE level >= 50;
```

Example / Explanation: `>=` means greater than or equal to.

Question 11. Find gamers whose coins are 3000 or less

```
SELECT * FROM gamers WHERE coins <= 3000;
```

Example / Explanation: `<=` means less than or equal to.

Question 12. Find gamers who are NOT from India

```
SELECT * FROM gamers WHERE country <> 'India';
```

Example / Explanation: `<>` means not equal to.

Level 4 — AND

Question 13. Find Indian gamers using PC

```
SELECT * FROM gamers WHERE country = 'India' AND platform = 'PC';
```

Example / Explanation: AND means both conditions must be true.

Question 14. Find PC gamers whose level is greater than 70

```
SELECT * FROM gamers WHERE platform = 'PC' AND level > 70;
```

Example / Explanation: Both conditions must be true.

Question 15. Find Indian gamers whose score is greater than 20000

```
SELECT * FROM gamers WHERE country = 'India' AND score > 20000;
```

Example / Explanation: Both conditions must be true.

Level 5 — OR

Question 16. Find gamers from India OR USA

```
SELECT * FROM gamers WHERE country = 'India' OR country = 'USA';
```

Example / Explanation: OR means either condition can be true.

Question 17. Find gamers using PC OR PlayStation

```
SELECT * FROM gamers WHERE platform = 'PC' OR platform = 'PlayStation';
```

Example / Explanation: Returns gamers matching either platform.

Question 18. Find gamers having Gold OR Diamond rank

```
SELECT * FROM gamers WHERE rank_tier = 'Gold' OR rank_tier = 'Diamond';
```

Example / Explanation: Either rank can match.

Level 6 — NOT

Question 19. Find gamers who are NOT using PC

```
SELECT * FROM gamers WHERE NOT platform = 'PC';
```

Example / Explanation: NOT reverses the condition.

Level 7 — LIKE

Question 20. Find usernames starting with Shadow

```
SELECT * FROM gamers WHERE username LIKE 'Shadow%';
```

Example / Explanation: `%` means zero or many characters.

Question 21. Find usernames ending with 13

```
SELECT * FROM gamers WHERE username LIKE '%13';
```

Example / Explanation: The pattern ends with 13.

Question 22. Find usernames containing Gamer

```
SELECT * FROM gamers WHERE username LIKE '%Gamer%';
```

Example / Explanation: The word Gamer can appear anywhere.

Question 23. Find countries starting with I

```
SELECT * FROM gamers WHERE country LIKE 'I%';
```

Example / Explanation: The value starts with I.

Question 24. Find usernames starting with Cyber

```
SELECT * FROM gamers WHERE username LIKE 'Cyber%';
```

Example / Explanation: The value starts with Cyber.

Level 8 — NOT LIKE

Question 25. Find usernames that do NOT start with Shadow

```
SELECT * FROM gamers WHERE username NOT LIKE 'Shadow%';
```

Example / Explanation: NOT LIKE excludes the matching pattern.

Question 26. Find usernames that do NOT contain Gamer

```
SELECT * FROM gamers WHERE username NOT LIKE '%Gamer%';
```

Example / Explanation: Excludes usernames containing Gamer.

Level 9 — BETWEEN

Question 27. Find gamers whose level is between 50 and 80

```
SELECT * FROM gamers WHERE level BETWEEN 50 AND 80;
```

Example / Explanation: BETWEEN checks a range; 50 and 80 are included.

Question 28. Find gamers whose score is between 15000 and 25000

```
SELECT * FROM gamers WHERE score BETWEEN 15000 AND 25000;
```

Example / Explanation: Checks whether score is in the range.

Level 10 — IN

Question 29. Find gamers from India, Japan or USA

```
SELECT * FROM gamers WHERE country IN ('India', 'Japan', 'USA');
```

Example / Explanation: IN checks multiple possible values.

Question 30. Find gamers using PC, Xbox or PlayStation

```
SELECT * FROM gamers WHERE platform IN ('PC', 'Xbox', 'PlayStation');
```

Example / Explanation: Any listed platform can match.

Level 11 — DISTINCT

Question 31. Show all different countries

```
SELECT DISTINCT country FROM gamers;
```

Example / Explanation: DISTINCT removes duplicate values from the result.

Question 32. Show all different platforms

```
SELECT DISTINCT platform FROM gamers;
```

Example / Explanation: Shows each platform once.

Question 33. Show all different rank tiers

```
SELECT DISTINCT rank_tier FROM gamers;
```

Example / Explanation: Shows each rank tier once.

Question 34. Show all different combinations of country and platform

```
SELECT DISTINCT country, platform FROM gamers;
```

Example / Explanation: DISTINCT applies to the combination of selected columns.

Level 12 — COUNT()

Question 35. How many gamers are there?

```
SELECT COUNT(*) FROM gamers;
```

Example / Explanation: COUNT(*) counts rows.

Question 36. How many gamers are from India?

```
SELECT COUNT(*) FROM gamers WHERE country = 'India';
```

Example / Explanation: COUNT + WHERE.

Question 37. How many gamers use PC?

```
SELECT COUNT(*) FROM gamers WHERE platform = 'PC';
```

Example / Explanation: Counts only PC gamers.

Question 38. How many Diamond players are there?

```
SELECT COUNT(*) FROM gamers WHERE rank_tier = 'Diamond';
```

Example / Explanation: Counts Diamond players.

Level 13 — COUNT + DISTINCT

Question 39. How many different countries are represented?

```
SELECT COUNT(DISTINCT country) FROM gamers;
```

Example / Explanation: DISTINCT removes duplicates, then COUNT counts the remaining different countries.

Question 40. How many different platforms are there?

```
SELECT COUNT(DISTINCT platform) FROM gamers;
```

Example / Explanation: Counts different platforms.

Question 41. How many different rank tiers are there?

```
SELECT COUNT(DISTINCT rank_tier) FROM gamers;
```

Example / Explanation: Counts different rank tiers.

Level 14 — SUM()

Question 42. Find total coins of all gamers

```
SELECT SUM(coins) FROM gamers;
```

Example / Explanation: SUM adds numeric values.

Question 43. Find total score of all gamers

```
SELECT SUM(score) FROM gamers;
```

Example / Explanation: Adds all scores.

Level 15 — AVG()

Question 44. Find average gamer level

```
SELECT AVG(level) FROM gamers;
```

Example / Explanation: AVG calculates the average.

Question 45. Find average score

```
SELECT AVG(score) FROM gamers;
```

Example / Explanation: Calculates average score.

Level 16 — MIN and MAX

Question 46. Find the highest score

```
SELECT MAX(score) FROM gamers;
```

Example / Explanation: MAX finds the largest value.

Question 47. Find the lowest score

```
SELECT MIN(score) FROM gamers;
```

Example / Explanation: MIN finds the smallest value.

Question 48. Find the highest level

```
SELECT MAX(level) FROM gamers;
```

Example / Explanation: Finds the largest level.

Question 49. Find the lowest number of coins

```
SELECT MIN(coins) FROM gamers;
```

Example / Explanation: Finds the smallest coin value.

Mixed Practice

Question 50. Find Indian gamers whose level is greater than 70

```
SELECT * FROM gamers WHERE country = 'India' AND level > 70;
```

Example / Explanation: Combines WHERE, AND and `>`.

Question 51. Find PC gamers whose score is greater than 20000

```
SELECT * FROM gamers WHERE platform = 'PC' AND score > 20000;
```

Example / Explanation: Combines WHERE, AND and `>`.

Question 52. Find Gold or Diamond players

```
SELECT * FROM gamers WHERE rank_tier IN ('Gold', 'Diamond');
```

Example / Explanation: Uses IN with two possible values.

Question 53. Find gamers whose username starts with Cyber and whose level is greater than 50

```
SELECT * FROM gamers WHERE username LIKE 'Cyber%' AND level > 50;
```

Example / Explanation: Combines LIKE, AND and `>`.

Question 54. Find Indian gamers whose username contains Gamer

```
SELECT * FROM gamers WHERE country = 'India' AND username LIKE '%Gamer%';
```

Example / Explanation: Combines WHERE, AND and LIKE.

Question 55. Count Indian gamers having level greater than 50

```
SELECT COUNT(*) FROM gamers WHERE country = 'India' AND level > 50;
```

Example / Explanation: Combines COUNT, WHERE and AND.

Question 56. Count gamers who are NOT using PC

```
SELECT COUNT(*) FROM gamers WHERE platform <> 'PC';
```

Example / Explanation: Counts rows that are not PC.

Question 57. Count gamers from India, USA and Japan

```
SELECT COUNT(*) FROM gamers WHERE country IN ('India', 'USA', 'Japan');
```

Example / Explanation: Combines COUNT, WHERE and IN.

Question 58. Find gamers whose level is between 40 and 80 and rank is Gold

```
SELECT * FROM gamers WHERE level BETWEEN 40 AND 80 AND rank_tier = 'Gold';
```

Example / Explanation: Combines BETWEEN and AND.

Question 59. Count different countries

```
SELECT COUNT(DISTINCT country) FROM gamers;
```

Example / Explanation: Counts unique countries.

Question 60. Find the average score of PC gamers

```
SELECT AVG(score) FROM gamers WHERE platform = 'PC';
```

Example / Explanation: Combines AVG with WHERE.
